PROFESSIONAL SUMMARY

Full-Stack Developer specializing in React, Next.js, and Node.js — with a track record of shipping real-world, production-grade applications end-to-end. Experienced in building real-time systems, AI-integrated platforms, and subscription-based SaaS products; strong DSA foundation with 300+ problems solved.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript (ES2022+), Java, C, SQL, HTML5, CSS3
Frontend: React.js, Next.js (App Router & Pages), Tailwind CSS, Fabric.js
Backend: Node.js, Express.js, tRPC, REST APIs, WebSockets, Inngest
Databases & Caching: PostgreSQL, MongoDB, Redis, Neon DB, Convex
ORMs: Prisma, Drizzle ORM, Mongoose
Authentication & Payments: Clerk, Better Auth, JWT
Cloud & DevOps: AWS (EC2, S3, ECR), Docker, Vercel, GitHub Actions, CI/CD Pipelines, ImageKit CDN
Tools: Git, GitHub, Postman, VS Code, PowerShell Bun, TurboRepo
Core Concepts: Data Structures & Algorithms, OOP, System Design Basics, Real-Time Communication

PROJECTS

- Meet-AI** | [GitHub](#) | [Live](#) Jun 2025 – Apr 2026
- Architected and led development of a full-stack, real-time AI-powered video conferencing platform, establishing a production-ready infrastructure using Docker and automated CI/CD deployment pipelines on AWS (ECR/EC2).
 - Integrated Stream.io Video & Chat SDKs to power high-fidelity, low-latency audio/video conferences, screen sharing, and real-time chat supporting multiple concurrent sessions.
 - Built an interactive AI meeting assistant featuring conversational memory, allowing users to query meeting transcripts and receive context-aware answers, with active records cached in Redis to minimize database hits and latency.
 - Tech stack:** *Next.js 15 (App Router), tRPC, Better-Auth, Drizzle ORM, Neon PostgreSQL, Redis, Inngest, OpenAI, Stream SDKs (Video & Chat), Polar.sh.*
- Nova — AI Image Editor** | [GitHub](#) | [Live](#) Jul 2025 – Aug 2025
- Built a comprehensive browser-based image editing application shipping 15+ features spanning traditional tools (crop, resize, filters, text overlay) and AI-powered capabilities (background removal, generative extend, smart retouch).
 - Implemented a two-tier subscription model (Free / Pro) with Clerk, engineering role-based access control middleware that gates AI features server-side to prevent client-side bypass.
 - Integrated ImageKit CDN for the full image processing pipeline, cutting average upload and transformation times by 65% while supporting high-resolution assets without perceptible lag.
 - Tech stack:** *Next.js, React, Tailwind CSS, Convex, Clerk, Fabric.js, ImageKit*
- Foodi — Restaurant Ordering Platform** | [GitHub](#) | [Live](#) Mar 2024 – Oct 2024
- Designed and built a complete restaurant ordering system from scratch — covering menu browsing, cart management, order tracking, payment processing, and an admin dashboard — across 25+ React components organized into 6 feature modules.
 - Implemented secure, stateless authentication handling 8+ distinct user flows (registration, login, email verification, password reset, session expiry) via JWT with refresh token rotation.
 - Engineered a mobile-first responsive design system achieving 98% cross-browser compatibility, with a component library reused across customer-facing and admin views to maintain visual consistency.
 - Tech stack:** *React, Node.js, Express.js, MongoDB, JWT*

ACHIEVEMENTS & CERTIFICATIONS

300+ LeetCode Problems Solved — consistent practice across arrays, trees, graphs, dynamic programming, and system design fundamentals.
Hackathon Participation (3+) — delivered 2–4 functional full-stack MVPs within 24–48 hour windows, sharpening rapid scoping, technical decision-making, and cross-functional teamwork under deadline pressure.

EDUCATION

NSHM Knowledge Campus, Durgapur (MAKAUT) Durgapur, West Bengal
Bachelor of Technology in Computer Science & Engineering — CGPA: 7.1 / 10.0 Sept 2022 – Expected May 2026
